**Date:** May 26, 2015

V. Don Olson  
479 Lemhi Road  
Salmon, ID 83467

Dear Don,

The following letter will document your meeting with Ingrid Drieling, Don Olson, Kathy Olson and Shawn Olson on April 17<sup>th</sup>, 2015 and will serve as your Annual Operating Instructions (AOI) on the Tenmile C&H and Twelvemile C&H allotments for the 2015 grazing season. The authorized use for the Tenmile C&H and Twelvemile C&H allotments for cattle with  the brand will be as follows:

**Permitted Use**

<u>Allotment</u>	<u>Permittee</u>	<u>Number/Class</u>	<u>H.M.</u>	<u>Dates</u>
Tenmile C&H	V. Don Olson	47 c/c	70	6/1-7/15
Twelvemile C&H	V. Don Olson	150 c/c	345	7/16-9/23

**Authorized Use for the 2015 Grazing Season**

<u>Allotment</u>	<u>Permittee</u>	<u>Number/Class</u>	<u>H.M.</u>	<u>Dates</u>
Tenmile C&H	V. Don Olson	47 c/c	70	6/1-7/15
Twelvemile C&H	V. Don Olson	150 c/c	345	7/16-9/23

<u>Allotment</u>	<u>Unit</u>	<u>Number/ Class</u>	<u>H.M.</u>	<u>Dates</u>
<b>Tenmile C&amp;H</b>	Tenmile/Elevenmile	47 c/c	70	6/01-7/15

<b>Twelvemile C&amp;H</b>	Twelvemile Bottoms	150c/c	153	7/16-8/15
	Twelvemile & Porcupine	150c/c	192	8/16-9/23
	Twelvemile Meadows			REST

Only cattle with the  brand will be authorized to graze on the Tenmile C&H and Twelvemile C&H allotments. The Annual Operating Instructions are made part of your Term Grazing Permit as per Part 2, Item 8(a) of the General Provisions and Regulations.

Situations may develop during the grazing season which requires changes to these instructions. Dates listed in the authorized use section may vary based on management needs or range readiness and proper use standards. **If changing unit move dates becomes necessary, or if you cannot comply with**

some part of these instructions, contact Tina Ruffing, the Rangeland Management Specialist assigned to your allotments, and obtain approval before initiating changes or deviating from these instructions. Changes can be made based on resource objectives, provided the changes are first approved and documented by an authorized officer. Any extension of use beyond the permitted dates will not be authorized.

### **Allowable Use**

The allowable use standards for the Tenmile C&H and Twelvemile C&H are listed below. It is your responsibility to be aware and recognize utilization and alteration standards. You must move your livestock to the next unit planned, or off the allotment, when those standards have been met. If you need assistance determining utilization levels please contact Tina and she will assist you. **Once cattle are removed from a unit in accordance with use standards and unit scheduling, they are not allowed to return. Please ensure you clean all livestock from your units.** The Forest Service is responsible for monitoring your compliance with allowable use standards. Monitoring typically occurs within two weeks of your unit move date. Please contact your Tina if you would like to join range personnel when monitoring is done on your allotments.

### **Tenmile C&H:**

Riparian sites:

A maximum of **50%** use on the current year's growth of key riparian species.

Upland sites:

Maximum of **50%** use of current annual growth of key herbaceous species.

### **Twelvemile C&H:**

Key Area Location	Unit Name Creek Name	Monitoring Attribute	Use Indicator	Key Species	Trigger
<b>MIM M234</b>	<b>Twelvemile Bottoms Twelvemile Creek</b>	Browse Use	50% 30%	Willow Alder	45% 25%
		Greenline stubble	4 in.	Hydric spp.	5 in.
		Bank Alteration	20%	n/a	15%
<b>Upland sites</b>	All Units	Utilization	50%	Upland grass ssp.	45%
<b>Riparian Areas</b>	All Units	Utilization by Key Species	50%	Riparian grass species	45%

### **Biological Assessment and Opinion Requirements**

The Biological Opinion for the Twelvemile C&H Allotment laid out the following measures to be implemented to avoid and reduce potential impacts to ESA listed fish. The measures are as follows:

1. A rest rotation grazing system will continue to be used. Resting the Twelvemile Meadows Unit in alternate years provides benefits to riparian vegetation. This will help meet our long term riparian resource objective for greenline successional status.

2. The on date will be varied so that livestock will be placed on the allotment at range readiness. This will reduce the potential for bank alteration. This will help meet our long term riparian resource objective for bank stability.
3. Annual use indicators will dictate when livestock are moved between units or off the allotment within the terms of the term grazing permit including moves in response to fish spawning. Annual use indicators will be monitored by Forest Service personnel.
4. Permittees will continue to salt at least ¼ mile away from creeks. This will continue to reduce potential impacts on spawning areas and designated critical habitat.
5. Permittees will continue to distribute livestock away from streams and associated riparian areas (ride), reducing potential impacts on spawning areas and designated critical habitat.
6. Fences and water developments have been placed to reduce livestock use on streams and their associated riparian areas. This will continue to reduce impacts on spawning areas and designated critical habitat.

### **Range Improvements**

Range improvements listed in part three of your grazing permit must be maintained prior to livestock entering the allotment. Contact your Rangeland Management Specialist to discuss materials and supplies for any improvements that are in need of re-construction.

The following improvements were discussed:

- The Tenmile allotment boundary fence (#5343) has been abandoned and needs to be removed.
- The Twelvemile Trough #5228 is rusted out but can be repaired with a liner. This trough should be relocated.
- Porcupine Spring Drift Fence (#5137) is in good condition
- Tvelevemile Meadows Unit Fence is in Fair condition and should be replaced in the next two years. It can be repaired with brace posts, T-posts and wire.
- Twelvemile Bottoms Water Development (#5363) has not been installed as analysis of the project has not been completed. While logging was taking place on the allotment several years ago, a trough was delivered via an open logging road into the Porcupine Springs area, and analysis of the improvement was planned to occur in the near future. Although the trough is in place, approximately 200 feet of pipe is needed. Range Staff will look into the sturdy above ground pipe that is on the market and will also inform you when we have more information on the possibility of setting up a temporary trough or when NEPA will be done for this improvement.

### **General Management**

The grazing fees for 2015 are the base rate of \$1.69 per head month. Payment of your grazing bill is due prior to your earliest turnout date.

The Salmon-Challis Travel Management Record of Decision was signed December 24, 2009. With the issuance of this decision, all roads and trails designated for motorized use are shown on a motor vehicle use map (MVUM). Motor vehicle use maps may be obtained at any Salmon-Challis Ranger District office. As detailed in 36 CFR 261.13; 36 CFR 212.51a the prohibitions on motor vehicle use will

not apply to motor vehicle use that is specifically authorized under a written authorization issued under Federal law or regulation. **Effective March 20<sup>th</sup>, 2015 the Salmon Challis National Forest requires a Vehicle Use Permit, signed by the District Ranger, for ALL closed roads or off road travel. This must be displayed in windshield for Trucks or carried on ATV's, UTV's and Motorcycles. Contact your Rangeland Management Specialist to obtain a Vehicle Use Permit for any closed road or off-road travel.**

Approval of requests for personal convenience and resource protection nonuse is not automatic and the authorized officer should discuss the reasons for the nonuse request with the permittee. Requests for non-use must be done in writing and the approval of a request for non-use must be in writing by the authorized officer. Full or partial permittee convenience nonuse may be approved by the authorized officer for no more than three consecutive years and not more than four years in any ten year period.

Dead livestock must be moved at least 100 yards from water, roads, and trails.

Place salt at least ¼ mile from water sources and in areas lightly grazed to encourage an even distribution of utilization on the range.

Invasive weeds are becoming a serious threat to the welfare of our rangelands. Your assistance is needed to identify new outbreaks of weed populations and to prevent the establishment of weeds on the forest. We have implemented a Noxious Weed Free Hay order on our Forest. This will require any hay that is brought onto the National Forest to be certified free from noxious weeds.

If you spot a wild fire, report it immediately to the Central Idaho Interagency Dispatch Center in Salmon, ID at (208) 756-5157.

If you have any questions regarding any of the allotments for which you have permits, please call Tina Ruffing at (208) 756-5226 or myself at (208) 756-5247.

Sincerely,

*/s/ Jay T. Winfield*
